golden rainbow trout

Fish pictures from our [PA Fishes book](#).

The Tylersville Fish Culture Station (hatchery) was originally constructed in 1963 by the United States Department of Interior, Fish and Wildlife Service (USFWS) and was closed in 1977. In 1984, the Commission entered into a lease agreement with the USFWS to maintain and operate the facility. The hatchery is located on approximately 80 developed acres (125 total acres) with 5,000 feet of concrete linear raceways.

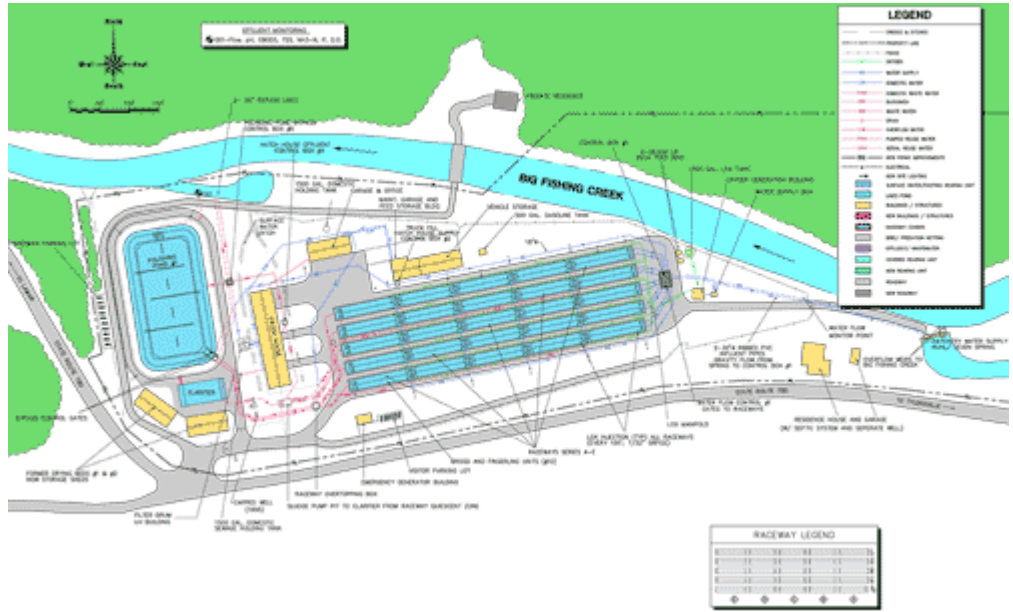

The water supply is a spring pool with 8 spring sources and infiltration of subsurface flow that originates from Big Fishing Creek.

Buildings include a hatch house/administrative office complex, maintenance garage/employee quarters building, and a pole building for vehicle storage.

HATCHERY STATS

- **Employees:** 12 full-time, 1 part-time
- **Annual Economic Impact for PA:** \$63,000,000
- **Average Fish Production:** 724,161 adult trout, 372,782 lbs.
- **Average Production Costs:** per fish = \$1.15, per pound = \$2.23
